Professional Experience

Graduate Research Assistant — Sept. 2022 – Present
University of Michigan — Ann Arbor, MI
- Developed an efficient algorithm using Python that leveraged generative models (e.g. diffusion models) to solve inverse problems such as inpainting and deblurring
- Investigated and proposed a provably efficient algorithm in Jax for the compression of deep learning models by studying its learning dynamics

Applied Research Data Science Intern — May 2022 – Aug. 2022
LinkedIn Corporation — Remote
- Designed and implemented a machine learning pipeline to forecast the capacity of LinkedIn's Kafka clusters (e.g. data storage) for efficient hardware ordering for the next calendar year
- Optimized several machine learning algorithms such as XGBoost and deep neural networks in Scala and Python

Graduate Research Assistant — Sept. 2020 – May 2022
Rutgers University — New Brunswick, NJ
- Developed a state-of-the-art algorithm in Python to recover time-dependent data from partial information of imaging data
- Designed and implemented an algorithm that allows hospitals to share private data for outlier detection by using t-SNE plots

Data Science Intern — May 2020 – Aug. 2020
Centene Corporation — Remote
- Automated the process of detecting expedition phrases in healthcare forms using Restricted Boltzmann Machines and Convolutional Neural Networks in Tensorflow
- Designed and optimized several machine learning algorithms (Support Vector Machines, Logistic Regression, XGBoost) for statistical inference on diseases given pharmacy data
